What Are the Advantages of Immunotherapy?

- ❖ Immunotherapy may work when other treatments don’t work.
- ❖It can help other cancer treatments work better.
- ❖It has fewer side effects than other treatments.
- ❖Your cancer may be less possible to return.
- ❖You can have immunotherapy alone or in combination with other treatments.

Our products

NiK Cell

For systemic administration

NiKogene

Allogenic NK cell

NiKord

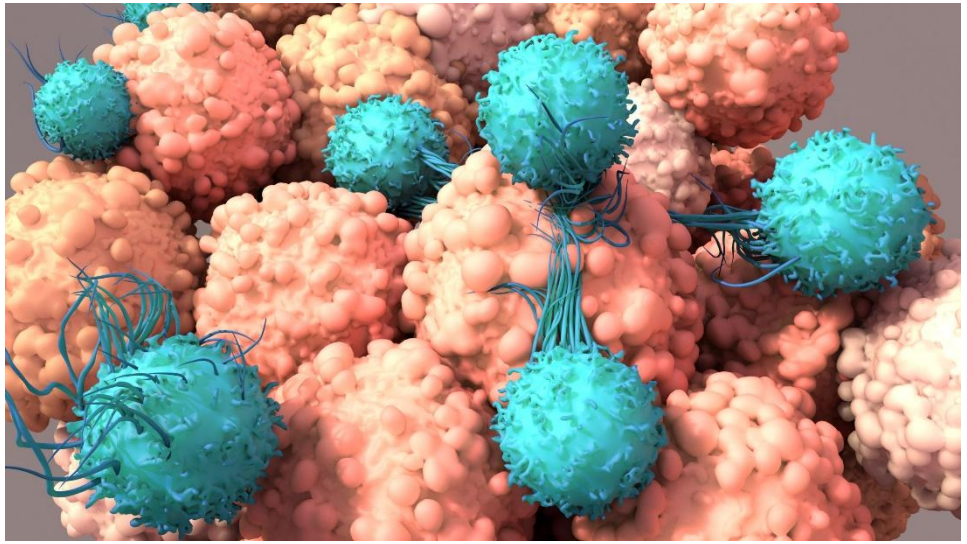
Cord blood NK

NiKtoral

NK+NKT Cell

Chemobiogram kit

NiK cell (haploidentical NK cell)



NiK cell

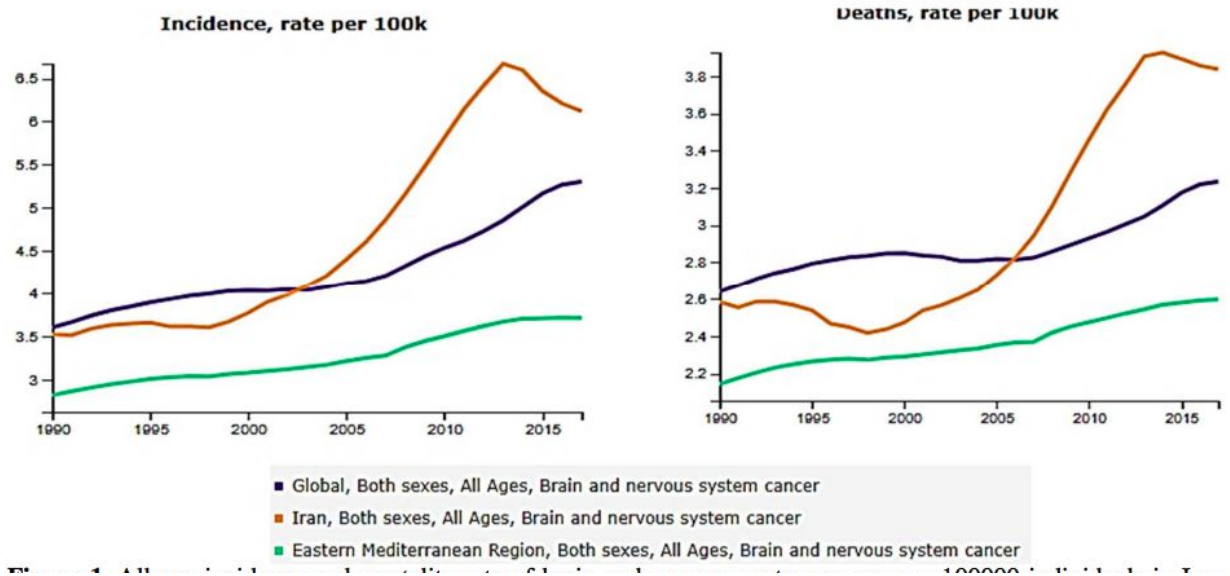
This product is haploidentical NK cells, for the treatment of hematologic malignancies and solid tumors.

Glioblastoma (Phase I)

Neuroblastoma (Phase I,Iia)

پژوهشگاه رویان

Problem: Malignant Brian Tumor
A cancer with more difficulty in Treatment



Curr J Neurol 2022; Hedayat Abbastabar

slidesalad
