- Cost-Effectiveness
- Efficient Learning
- Bite-sized Content

- Increased Engagement
- Social Interaction
- Data collection
- Skill Aquisition & Retention
- Motivation & Persistence
- Personalization & Adaptivity

Internal training of companies
Educational services of academies

What we do

Attractiveness of Gamification

Our approach in SKIDEMY is implementing game elements such as coins, scores, badges, leagues etc. in E-Learning to maximize enjoyment and engagement by capturing the interest of learners and inspiring them to continue learning.

Benefits of Microlearning

In SKIDEMY we design courses as a set of compact learning media content together. Breaking the information down into topical, bite-sized segments helps to increase attention and promotes higher retention rates and can result in significant increase of exam pass rates and also increase learner confidence with the material.

Power of E-Learning

SKIDEMY is an integrated set of interactive online services that provide companies, trainers, learners, and academies with information, tools, and resources to support and enhance education delivery and management.

Who we are

We are a start-up team whose main capability is reducing the cost of learning and scaling educational services by developing gamification tools and microlearning essentials in our E-Learning platform.

We brought the power of E-learning, attractiveness of gamification, benefits of microlearning and need for personal branding together and developed a digital platform for internal training of companies and educational services of academies.

We believe that gamified education can be accessible anywhere, anytime and for anyone through our E-learning platform.
